Fair Speculation

It would almost sound wild to state how much value there would be to the stock of Alabama Oil Development Co. if producing wells had been brought in as the founders of the Company believe will happen. You would have to make an estimate as to such profits. What may happen as to finding paying quantities of oil in the future and therefore your investment is speculative. But it is fair speculation—such speculation as is very attractive to those who investigate it. Scientists of recognized ability have located a structure highly indicative of oil. Well known high class men are in charge of the Company. The Class A preferred and participating stock is protected by safe-guards of the best sort. For all these reasons the purchase of this stock offers a very attractive opportunity to engage in oil exploration with its possibilities of great profit. A simple prospecwhat scientists have said about oil, the safe-guards of stock investments and other interesting information will be mailed on request.

Paul Waner. Voted Most Valuable Player in 1927 National League, Says Luckies Do Not

Affect His Wind

"When I first started to smoke I was anxious to find a cigarette that would give me pleasure without taxing my wind or irritating my throat. I soon discovered Lucky Strikes. I am very fend of the excellent flavor of these cigarettes and they keep my throat clear and do not affect my wind in the least."

No Throat Irritation - No Cough

You Are Both Judge and Jury

"TRADE AT HOME-WITH HOME PEOPLE" it is said with the full consciousness that you are both judge and jury and that your verdict is final.

You are a free agent. You earn your own money and naturally you spend it where you please with whom you please, whenever you please. BUT LISTEN: Your home people—those whom you have known and have been dealing with for years-are your best friends. They stand by you. What they accumulate here in your town is invested here; all they have is taxable here; their purses are always open to worthy charitable purposes; in a word, they support home institutions 100 per cent all the time

Not so with outside concerns. They take your money away from home. They contribute to not a single local charitable cause, and your home institutions may "go hang" for all they care. They're simply after your money. They give no better values than your home people Think this matter over. We feel sure that you will get our

Announcement

to every owner of a

Model T Ford

ON MAY 25, 1927, when Henry Ford first announced his plans for making a new car, he announced also that he would continue to make parts for the Model T Ford. He said:

"The Model T Ford car was a pioneer. It blazed the

way for the motor industry and started the movement for

good roads everywhere. It broke down the barriers of

distance in rural sections, brought people in these sections

closer together, and placed education within the reach of

everyone. We are still proud of the Model T Ford. If we

were not, we would not have continued to make it so long."

For twenty years, the Model T Ford led the automobile

industry and it still serves more people than any other auto-

mobile. Over one-third of all the automobiles in use today

are Model T Fords - an indication of the sturdy worth

think proper.

Important

- J. W. DAVIS, Transferee. Wilkerson & Brunson,

THE FEDERAL LAND BANK OF NEW ORLEANS, Mortgagee.

of the car and its value to people in all walks of life the The Ford Motor Company will continue to make replacement parts for these cars "until the last Model T is off the road." That is a part of Ford service. That is what Henry Ford meant when he said: "We believe that when a man buys one of our cars we should keep it running for

him as long as we can and at the lowest up-keep cost." Because of this policy a considerable part of the Ford manufacturing plants is given over to the making of parts for the Model T Ford. These replacement parts are made, of the same material and in the same way as those from which your car was originally assembled.

Make it a point, therefore, to see the nearest Ford dealer and have him look over your Model T Ford. You may find that a very small expenditure will enable you to get thousands of miles of additional service, and at the same time protect the money you have invested in your car.
